

Get code

This page includes information for obtaining the latest Tiki source code.

- The current released Tiki version can be [downloaded from SourceForge.net](#) .
- Pre-release code can be downloaded from the [Git](#) repository.
- You can view the code here: <https://gitlab.com/tikiwiki/tiki/> .

There are several methods to download the latest Tiki code.

1.1. Option 1: Using Git

New to Git?

See here: [Git](#)

or here: [Pro Git Book \(CC ND SA 3.0\) by Scott Chacon and Ben Straub](#) 

Using the clone command (taken from [Git clone Tiki](#))

For more information about the *clone* command see [Git clone Tiki](#).

Commit your code

- See How to get commit access for information on contributing code and joining the Tiki developer community.
- You can also see [full instructions on how to commit](#).

Pre-release packages (zip files)

- [Daily Build](#)

Bit of History

- [Tiki Version control history](#)

Converting an FTP install

- Convert a site installed via FTP to now use SVN

Tiki Manager (formerly known as TRIM)

For managing multiple, independent Tiki installations. Please see [TRIM](#)

Amazon Machine Image (AMI) for EC2

Amazon Elastic Compute Cloud - Amazon Web Services. Please see: [EC2](#)

Errors

If you encounter errors while trying the above, see [Composer](#)
