</> Tiki Development

The place where Tiki *Users* meet Tiki *Developers*

Respect the environment * Commit early, Commit often * Make it optional

"Yes, Tiki does it."

Tiki strives to be a powerful Open Source Wiki / Content Management System / Groupware, therefore it has its own issue tracker.
Learn more about why we are eating our own DogFood.

Users

- Report a bug or suggest an enhancement
- Review your wishes
- Send suggestions in comments
- Submit a merge request

You are welcome to **become a developer**!

Developers

- **Browse the full list** of submitted bugs
- **Search** reported items
- Respond to reports made via **the tracker**
- Change the status of the tracker items
- Discuss ideas and plan new features

Visiting here for the first time?

Please do read How to Submit a new item on the Wishlist before submitting a bug or feature request.

The information on that page will help you to understand what the different fields mean and what to include in your submission.

Become a Developer!

The development of Tiki Wiki CMS Groupware is done in a collaborative fashion by a friendly community of several hundred contributors.

If you are new to open source projects or just new to Tiki, please start with TikiDevNewbie.
